

SMART BOBBY 2601

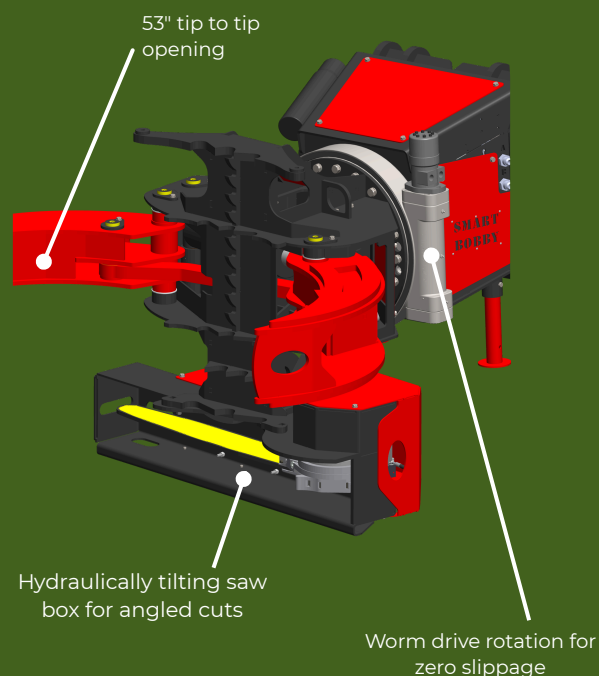

The Smart Bobby is a compact, high-performance grapple saw designed for rotating telehandlers. Delivering powerful gripping and cutting in a small footprint, this all-in-one tool securely holds trees while its hydraulically dual action tilting saw box enables precise angled cuts.

Additional features include the ability to extend the bar without the chain spinning to line up a cut, as well as a true worm drive rotation with self lock, providing endless, zero-slippage maneuverability.

2601 SPECIFICATIONS

ATTACHMENT WEIGHT (NO PLATE)	1750LB
GRAPPLE OPENING AT TIPS	53 INCHES
MAX LOAD CAPACITY	10,000LB
SAW HYDRAULIC FLOW	23-30GPM
SELF LOCKING ROTATION	360 CONTINUOUS
CHAIN SIZE	.404
SAW CARRIAGE TILT	40 DEGREES

PRECISION CUTTING TOTAL CONTROL

- Cut smarter, not harder – faster positioning and cleaner cuts with less operator effort
- Maximum control in tight spaces – compact design ideal for roadside, urban, and confined work zones
- One attachment, multiple jobs – grip, rotate, tilt, and cut without changing tools
- Reduced risk, increased safety – secure holding of material before and during cutting

Tree removal and sectional dismantling
Roadside and rail corridor maintenance
Utility line clearance
Land clearing and forestry operations
Urban and restricted-access
environments
